

ADAM H. EDELEN
AUDITOR OF PUBLIC ACCOUNTS

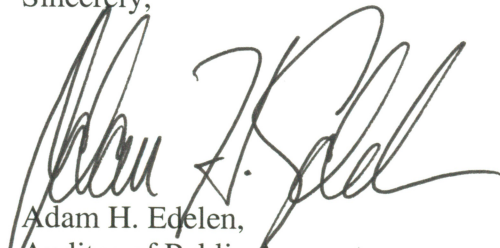

To Whom It May Concern:

I have had the pleasure of working with William (BJ) Bellamy for almost three years now. In that time, he has proven himself a skilled and dedicated programmer, cybersecurity expert and network administrator. Having someone with such a range of capabilities has been tremendously beneficial to my administration. Whether building our *Citizen Auditor Database* to provide oversight to special districts, providing guidance on our cybersecurity legislation, designing software to keep track of tips on taxpayer abuse, or installing anti-virus software on over one hundred new computers, BJ has always welcomed new challenges and has consistently been able to meet them.

He has played an important role in developing much of the technology our office relies upon for many of its critical day-to-day functions, as well as those which have supported our successful efforts to engage the public. Earlier this year, I was named one of *Government Technology Magazine's* "Top Doers, Dreamers, and Drivers", and BJ and our other IT staff deserve much of the credit for this honor.

Due to his many contributions during my administration and others long before I had the honor of serving in this role, I strongly recommend BJ for a position with the Commonwealth Office of Technology. I'm confident he will be as much of an asset to COT as he was to our office.

Sincerely,

Adam H. Edelen,
Auditor of Public Accounts
